

To Alaska Local Boundary Commission
 Editor Ketchikan Daily News

We learn to love this country of government for the people by the people AND of the people. Then we witness things like this ANNEXATION process of Mexers, Chuck, Loring and Hyder against their will. Must they succumb to us fools or folly in a grab bag of money cram another layer of government down their throats to sit in their craw for the rest of their life. And then for the powers to be claim this is all but due to a technicality on how federal timber funds are distributed. To enable us to take more from thy neighbor.

If this ANNEXATION prevails either I am in the minority or we as an electorate have failed and allowed government to become more powerful than the will of the people
