MAP NOTES
This map was prepared by the Alaska Department of Commerce, Community, and Economic Development, Division of Community and Regional Affairs (Commerce) using funding from Federal Emergency Management Agency and US Department of the Interior Bureau of Indian Affairs. Commerce contracted with Global Positioning Services, Inc. in June of 2009 to prepare the map.

This map should not be construed as a survey. On-site surveys should be conducted prior to engineering or construction. This map was compiled to meet horizontal and vertical accuracy in accordance with national map accuracy standards.

Property and utility information has been generated from readily available sources with limited accuracy checks. Property information is not intended to represent a title search of the Recorder's office record. Utility location is approximate and shows only the main lines. Generally, the information is current as of December 2009. ANTHC provided sanitation facility records.

This map is based on photography acquired on July 19, 2009, at a nominal scale of 1 in = 800 ft. Aero-Metric Anchorage prepared the orthophoto and topographic mapping. The topographic contours were prepared at two (2) foot intervals with index contours every ten (10) feet.

HORIZONTAL AND VERTICAL CONTROL
The horizontal and vertical control station for this digital map and orthophoto was an NGS OPUS solution for GPS Inc. TBM "BASE 1". The horizontal datum NAD 1983 coordinates for this TBM are North 62° 39' 02.74173" and West 160° 11' 22.84738". The Geoid 06 elevation for this station is 289.10 feet.

The mapping of the village of Anvik has been adjusted to this control using high-precision GPS methods and the adjusted coordinates and elevation for BLM Monument "USS 728, LI, 07", were calculated to establish a local control reference. The NAD 1983 coordinates for this monument are North 62° 39' 21.1129" and West 160° 12' 25.5811" and the elevation is 112.98 feet.

This map projection is based upon NAD 83, ASP Zone 7 as expressed in US Survey Feet.

FLOOD NOTES
The US Army Corps of Engineers (USACE) report "Alaska Communities Flood Hazard Data 2009", has a published flood of record which occurred in 1991 with a flood elevation of 108.3' (89.56 feet based upon this map's vertical control). A flood gauge was placed on a utility pole.
