HORIZONTAL AND VERTICAL CONTROL
 The horizontal control monument for the digital orthophoto was NGS Monument "PAT 1966". The horizontal datum NAD 1983 coordinates for this monument are North 60° 04' 28.6495" and West 147° 59' 48.6222".

The village of Chenege has been adjusted to this control using high-precision GPS methods and the adjusted coordinates and OPUS elevation for this control are North 60° 04' 01.1860" and East 147° 00' 40.9631" and the Geoid 99 elevation is 48.17 feet above mean sea level (MSL).

This map projection is based upon ASP Coordinate System of 1983, Zone 4 as expressed in U.S. Survey Feet.

The contours were prepared at two (2) foot contour intervals with index contours every ten (10) feet.

MAP NOTES
 This map was prepared by the North Pacific Rim Housing Authority in cooperation with the Alaska Department of Commerce, Community and Economic Development (Commerce) using funding from U.S. Department of Housing and Urban Development, the Chenege IRA Council and funding from the Initiative for Accelerated Infrastructure Development (IAID). The IAID is supported by grants from the Denali Commission, USDA Rural Development, Alaska Department of Transportation and Public Facilities and Commerce. The North Pacific Rim Housing Authority contracted with Global Positioning Services, Inc. in May of 2005 to prepare the map.

This map should not be construed as a survey. On-site surveys should be conducted prior to engineering or construction.

This map was compiled to meet horizontal and vertical accuracy in accordance with national map accuracy standards.

Property and utility information has been generated from readily available sources with limited accuracy checks. Property information is not intended to represent a title search of the Recorder's Office record. Utility location is approximate and shows only the main lines as the service lines have been omitted for clarity. Generally, the information is current as of December 2005.

The Alaska Native Tribal Health Consortium provided sanitation facility records.

This map is based on photography acquired on June 28, 2005, and August 27, 2005 at a nominal scale, of 1 in = 800 ft.

AeroMap U.S. prepared the orthophoto and topographic mapping. The orthophoto is a serial photo which has been corrected, by rectification to ground control stations, to remove distortions and warpage due to ground topography and aircraft tilt and trim.
