

COMMUNITY MAP

EKWOK

59°22'N 157°30'W Approximately 100'

The preparation of this document was financed in part by funds from the Alaska Coastal Management Program in the Office of Coastal Zone Management, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, and the Alaska Department of Transportation and Public Facilities, administered by the Division of Community Planning, Alaska Department of Community and Regional Affairs, January 1985.

Note: These maps have been prepared from uncontrolled aerial photographs. Scale is approximate and minor distortion may exist. Property and utility information has been generalized from many sources and may contain minor inconsistencies. These maps should not be construed as surveys. On-site investigations should be conducted prior to construction.

1. Post office
2. Clinic (under construction)
3. School
4. City generator building
5. Community workshop
6. Alcohol counseling house
7. Community hall/Clinic
8. School generator building
9. Baptist church
10. Russian Orthodox church
11. Community workshop
12. Store

Community Map—Maps are useful in illustrating land use patterns, land ownership, location of utilities, and able in planning for future improvements. These maps can be prepared by surveying the land and/or by enlarging aerial photographs.

The Community Map shown here was prepared from a BLM aerial photograph taken in 1974 at a height of 8,400 feet, and enlarged to a scale of 1:2,400 (1 in. = 200 ft.). This map has been used to display present utilities, public facilities, and residential and commercial development. In addition, other information has been portrayed which will aid in evaluating the area for new construction and city expansion.

The Regional Map, prepared from a 1974 BLM photograph, taken at an elevation of 8,400 feet and printed at a scale of 1:16,800 (1 in. = 1,400 ft.), clearly shows the community and the surrounding area. Ekwok is located about a quarter of a mile north of a small stream that flows into the Nushagak River. A fairly low, flat area stretches north of the stream, and then rises abruptly, forming a high bank. The stream valley rises gradually to the west. There is a low ridge about a quarter of a mile behind the community.

This kind of data is very important in developing plans for community growth and expansion. It is useful in gaining an understanding of some of the natural and man-made features that affect the community, including flood hazards, erosion, source of water supply and location of waste disposal sites.

Much of riverbank is subject to erosion, according to local sources.

**City of Ekwok Municipal Boundary**

The description of the municipal boundaries approved by the State is as follows:

Beginning at the SE corner of the NE ¼ of unsurveyed T10S, R49W, Seward Meridian, Alaska; thence North to the NE corner of the SE ¼ of unsurveyed T8S, R49W; thence West to the NW corner of the SE ¼ of unsurveyed T8S, R49W; thence South to the SW corner of the NE ¼ of the unsurveyed T10S, R49W; thence East to the point of beginning, containing 18 square miles, more or less.
