MAP NOTES

This map was prepared by the Copper River Basin Housing Authority (CRBHA) in cooperation with the Alaska Department of Commerce, Community and Economic Development, (Commerce) using funding from CRBHA, Ahtna Incorporated, and funding from the initiative for Accelerated Infrastructure Development (AID). The AID is supported by grants from the Denali Commission, USDA Rural Development, Alaska Department of Transportation and Public Facilities and Commerce. The Copper River Basin Regional Housing Authority contracted McClintock Land Associates, Inc. in May of 2005 to prepare the map.

This map was compiled to meet horizontal and vertical accuracy in accordance with national map accuracy standards.

Property and utility information has been generated from readily available sources with limited accuracy checks. Property information is not intended to represent a title search of the Recorder's Office record. Utility location is approximate and shows only the main lines as the service lines have been omitted for clarity. Generally, the information is current as of December 2005.

This map is based on photography acquired on May 11, 2005 at a nominal scale of 1 in = 800 ft. Orthophotos and topographic mapping were prepared by McClintock Land Associates.

The orthophoto is an aerial photo which has been corrected, by rectification to ground control stations, to remove distortions and warpage due to ground topography and aircraft tilt and trim.

HORIZONTAL AND VERTICAL CONTROL
The horizontal coordinate system is (NAD 83) Alaska State Plane Zone 3 (US Feet) based on CORS station "GNA" in Glennallen, Alaska. The published position of "GNA" converted to a state plane yields Northing: 2964087.277', Easting: 1645521.082'.

The vertical datum is NAVD 88, computed by applying geoid 99 to GRS 80 ellipsoid heights, measured using GPS observations. The basis for the vertical datum is NGS monument "H 90" which was published with a NAVD 88 (US Feet) elevation of 696.22'.

The contours were prepared at two (2) foot contour intervals with index contours every ten (10) feet. Two (2) foot contours have been omitted in steep areas, leaving only the index contours, for clarity.

FLOOD DATA: No flood data on record.
