SCALE: 1"=200'
Date of Photography: October 1, 1994
Magnetic Declination computed by U.S.G.S. Geomag SHEET
Program using AK-1995.CDF model as of May 1, 1996. 1 of 1

MAP NOTES
This map was prepared by Kawerak, Inc. in cooperation with the Alaska Department of Community and Regional Affairs (DCRA), Municipal and Regional Assistance Division, using funds provided by the U.S. Bureau of Indian Affairs. Kawerak, Inc. contracted with McClintock Land Associates, Inc. in 1996 to prepare the map.
This map is based upon a digital orthophoto prepared to National Map Accuracy Standards by AeroMap, U.S., Inc. from their October 1, 1994 photography (original scale 1" = 500').
The orthophoto is an aerial photo which has been corrected, by rectification to ground control stations, to remove distortions and warpage due to ground topography and aircraft tilt and trim.
This map should not be construed as a survey. On-site surveys should be conducted prior to engineering or construction.
Property and utility information has been generated from the best available sources with limited accuracy checks. Utility location is particularly imprecise and shows only the main lines as the service lines have been omitted for clarity. Generally, the information is current as of May, 1996.
The status of the subsurface estate is not shown on this map. The Chapter 11 Reorganization of the Bering Straits Native Corporation resulted in the transfer of certain subsurface lands to several Village Corporations.

FLOOD DATA
The U.S. Army Corps of Engineers (C.O.E.) has established flood data for this community. The C.O.E. Temporary Benchmark is the front door sill of the new high school with an assumed elevation of 100.0'. The approximated high water flood elevation is 98.9'. The source of this information is a document titled "Alaska District Corps of Engineers Flood Plain Management Services High Water Elevation Identification" for the community of Golovin, dated June 1, 1994.
Flood Hazard exists in this community. Contact C.O.E. or DCRA Flood Hazard Specialist for information for safe building elevations.
