**MAP NOTES**  
This map was prepared by the Lake and Peninsula Borough (LPB) in cooperation with the Alaska Department of Community and Economic Development (DCED) using funding from the Alaska Coastal Management Program, U.S. Bureau of Indian Affairs Transportation Planning and funding from the Initiative for Accelerated Infrastructure Development (IAID). The IAID is supported by grants from the Denali Commission, USDA Rural Development, Alaska Department of Transportation and Public Facilities and DCED. The LPB contracted with Global Positioning Services, Inc. in May of 2003 to prepare the map.

This map should not be construed as a survey. On-site surveys should be conducted prior to engineering or construction.

This map was compiled to meet horizontal and vertical accuracy in accordance with national map accuracy standards.

Property and utility information has been generated from readily available sources with limited accuracy checks. Property information is not intended to represent a title search as the Recorders Office record. Utility location is approximate and shows only the main lines as the service lines have been omitted for clarity. Generally, the information is current as of December 2003.

The Alaska Native Tribal Health Consortium provided sanitation facility records.

This map is based on photography acquired on August 28, 2002, at a nominal scale, of 1 in = 800 ft.

AerMap U.S. prepared the orthophoto and topographic mapping. The orthophoto is an aerial photo which has been corrected, by rectification to ground control stations, to remove distortions and warpage due to ground topography and aircraft tilt and trim.

**HORIZONTAL AND VERTICAL CONTROL**  
The control monument for the digital photo was ILLIAMNA EAST BASE. Published horizontal datum NAD 1983 coordinates are North 59° 45' 47.8100" and West 154° 49' 147.5241". The vertical datum NVD 1929 is 117 feet above mean high water (MHW). The village of Igiugig has been adjusted to this control using global positioning systems and aerial photogrammetric methods.

The contours were prepared at two (2) foot contour intervals with index contours every ten (10) feet.
