23. FAA air traffic control tower
24. Department of Transportation and Public Facilities maintenance station
25. FAA fire equipment storage
26. Dredger Fisheries
27. Charles Sport Shop
28. Northern Peninsula Fisheries

Community Map The profile maps are useful in illustrating land use patterns, land status, location of power lines, water resources, waste disposal sites, and public facilities. They also provide an understanding of some of the natural features and hazards that affect the community. This information is very important in planning for community improvements and expansion.

The Community Map shown here was prepared from an aerial photograph taken in 1981 by North Pacific Aerial Survey at a height of 8400 feet and enlarged to a scale of 1" = 300'. The Area Map was taken by the U.S. Army Corps of Engineers at a height of 7800 feet and reproduced at a scale of 1" = 1400'.

Adapted from information collected by U. S. Fish and Wildlife Service and Alaska Department of Fish and Game as part of the Bristol Bay Cooperative Management Plan.

1. Yukon-Delta National Wildlife Refuge
2. Tokaj National Wildlife Refuge
3. Wood-Titchik State Park
4. Katmai National Park & Preserve
5. Becharof National Wildlife Refuge
6. Alaska Peninsula National Wildlife Refuge
7. Aniakchak National Monument & Preserve
8. Denali National Wildlife Refuge

 - Oil and gas province or basin—occurrence high
- Source: AEIDC, AK Regional Profiles

- Upland spruce-hardwood forest
 - Moist tundra
 - Wet tundra
- Source: ADF&G & USF&WS

Note: These maps have been prepared from uncontrolled aerial photographs. Scale is approximate and minor distortion may exist. Property and utility information has been generalized from many sources and may contain minor inconsistencies. These maps should not be construed as surveys. On-site investigations should be conducted prior to construction.

The King Salmon community maps can be joined together as shown.
