MAP NOTES
This map was prepared by the Lake and Peninsula Borough (LPB) in cooperation with the Alaska Department of Community and Economic Development (CDED) using funding from the Coastal Impact Assistance Program, Coastal Management Program, Bureau of Indian Affairs Transportation Planning and funding from the Initiative for Accelerated Infrastructure Development (IAID). The IAID is supported by grants from the Denali Commission, USDA Rural Development, Alaska Department of Transportation and Public Facilities and CDED. The Alaska Native Tribal Health Consortium provided sanitation facility records. The LPB contracted with Global Positioning Services Incorporated in June of 2006 to prepare the map.
This map should not be construed as a survey. On-site surveys should be conducted prior to engineering or construction.
This map was compiled to meet horizontal and vertical accuracy in accordance with national map accuracy standards.
Property and utility information has been generated from readily available sources with limited accuracy checks. Property information is not intended to represent a comprehensive title search of the Records Office record. Utility location is approximate and shows only the main lines as the service lines have been omitted for clarity. Generally, the information is current as of December 2002.
This map is based on photography acquired on June 17, 2002, at a nominal scale, of 1 in = 800 ft.
Aeromap U.S. prepared the orthophoto and topographic mapping.
The orthophoto is an aerial photo which has been corrected, by rectification to ground control stations, to remove distortions and warpage due to ground topography and aircraft tilt and trim.
HORIZONTAL AND VERTICAL CONTROL
This map was prepared in Alaska State Plane coordinates zone 6, using horizontal datum NAD83 and vertical datum NGVD1989.
The control monument for the digital orthophoto was N.G.S. "C". Published horizontal datum NAD 1983 coordinates for this monument are North 56° 56' 54.2000" and West 158° 37' 54.0884". The vertical datum NGVD 1989 for this monument is 121.4 feet above mean high water (MHW) which is the basis for this maps contour elevations.
The contours were prepared at two (2) foot contour intervals with index contours every ten (10) feet.
