

COMMUNITY MAP SHAGELUK

62°41'N 159°34'W Elevation 70' (at airstrip)

The preparation of this document was financed by a special legislative appropriation for the Department of Community and Regional Affairs, administered by the Municipal and Regional Assistance Division.

Community Map - The profile maps are useful in illustrating land use patterns, land status, location of utility lines, water resources, waste disposal sites, public facilities and other improvements. They also provide an understanding of some of the natural features and hazards that affect the community improvements and expansion.

The Community Map shown here was prepared from an uncontrolled aerial photograph taken in 1983 by North Pacific Aerial Surveys for the State of Alaska, Department of Community and Regional Affairs that was enlarged from a scale of 1" = 500' to 1" = 100'. The Regional Map was prepared from an uncontrolled aerial photo that was taken at the same time as the Community Map at a scale of 1" = 2,000'. The Regional Map remained at 1" = 2,000'.

Property and utility information has been generalized from many sources and may contain minor inconsistencies. These maps should not be construed as surveys. On-site investigations should be conducted prior to construction.
