SCALE: 1"=200'
Date of Photography: June 13, 1996
Magnetic Declination computed by U.S.G.S. Geomag. SHEET 1 of 1
Program using AK-1995.COF model as of May 1, 1996.

MAP NOTES
This map was prepared by Kawerak, Inc. in cooperation with the Alaska Department of Community and Regional Affairs (DCRA), Municipal and Regional Assistance Division, using funds provided by the U.S. Bureau of Indian Affairs. Kawerak, Inc. contracted with McClintock Land Associates, Inc. in 1996 to prepare the map.

This map is based upon a digital orthophoto prepared to National Map Accuracy Standards by AeroMap, U.S., Inc. from their June 13, 1996 photography (original scale 1" = 1000').

The orthophoto is an aerial photo which has been corrected, by rectification to ground control stations, to remove distortions and warpage due to ground topography and aircraft tilt and trim.

This map should not be construed as a survey. On-site surveys should be conducted prior to engineering or construction.

Property and utility information has been generated from the best available sources with limited accuracy checks. Utility location is particularly imprecise and shows only the main lines as the service lines have been omitted for clarity. Generally, the information is current as of May, 1996.

The status of the subsurface estate is not shown on this map. The Chapter 11 Reorganization of Bering Straits Native Corporation resulted in the transfer of certain subsurface lands to several Village Corporations.

FLOOD DATA
The U.S. Army Corps of Engineers (C.O.E.) has not established exact flood data for this community. Preliminary flood hazard work shows the flood plain level to be approximately 14 feet.

Flood Hazard exists in this community. Contact C.O.E. or DCRA Flood Hazard Specialist for information for safe building elevations.
